SUMMARY

Motivated undergraduate engineering student with hands-on experience in AI, IoT, automation, web development, and database technologies. Interested in the intersection of technology and business, particularly AI automation, ERP solutions, SaaS products, and technology-driven growth. Experienced in building academic projects, understanding user requirements, troubleshooting technical problems, and explaining technical concepts clearly. Looking to contribute technical understanding, communication, research, and problem-solving skills as a Tech Sales & Growth Intern.

EDUCATION

Examination Name/Boards	Name of The Institution	Pass out year	% Marks
10 th [CBSE]	Kendriya Vidyalaya O.F DUM DUM	2022	89%
12 th [CBSE]	Kendriya Vidyalaya O.F DUM DUM	2024	67%
B.Tech(ECS) [MAKAUT, WB]	Narula Institute of Technology	2024-2028	CGPA till 3 rd year 7.98

PROJECTS

AI Voice Assistant | AI • NLP • Automation

- Developed a concept for an AI-powered voice assistant capable of understanding voice commands and performing useful tasks.
- Worked with concepts including Speech Recognition, Natural Language Processing (NLP), Text-to-Speech (TTS), web search, reminders, weather, music, date/time and application automation.
- Designed the project around a conversational interface to make technology easier and more accessible for users.
- Gained practical understanding of how AI capabilities can be converted into user-focused automation solutions.

Role: AI developer and ML concept

Smart Medicine Reminder & IoT Automation System | IoT • Automation • Embedded Systems

- Designed a smart medicine-management system using ESP32/ESP8266, IR sensors, displays, LEDs, speakers and connected components.
- Implemented automation logic for detecting box and compartment activity and providing visual/audio feedback.
- Explored mobile connectivity, HTTP/JSON communication and automated reminders.
- Troubleshoot hardware, sensor, I2C, display and communication issues during development.

Role: Original Concept, Hardware designer and developer

Student Project Marketplace — Product Concept | Product Strategy • Marketplace • Student Community

- Developing a concept for a platform where students can buy, sell, discover and contribute to academic projects.
- Identified different user roles and use cases including project buyers, project sellers and students looking to contribute to ongoing projects.
- Focused on creating a community-driven platform that connects student problems, technical skills and project opportunities.
- Exploring marketplace features, user needs, project discovery and potential growth opportunities.

Role: Concept, UI design and AI integration

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, HTML, CSS

AI & Automation: Artificial Intelligence, Machine Learning fundamentals, NLP, Speech Recognition, Text-to-Speech, IoT Automation

Database: SQL, DBMS, ER Model, Normalization, Join

Tools: Git, GitHub, VS Code, Arduino IDE

Hardware/IoT: ESP32, ESP8266, sensors, relays, displays, IoT-based automation

CERTIFICATIONS

Data Analytics with Python — Ardent Computer Tech

Multi-agent reinforcement — Ardent Computer Tech

National level Hackathon[SIH 2024] --- Finalist

Inter college level Hackathon Winner

RELEVANT EXPERIENCE & STRENGTHS

Technology & Product Understanding - Able to understand technical products and translate technical functionality into simple user-oriented explanations. - Experience identifying problems and developing technology-based solutions through academic projects. - Comfortable learning new technologies independently and troubleshooting implementation issues.

Communication & Growth - Interested in technology sales, SaaS, AI automation and business growth. - Able to research technical topics and communicate concepts in a structured manner. - Strong interest in understanding customer problems, product value propositions and practical use cases. - Comfortable working across technical and non-technical aspects of a project.

Development & Collaboration - Familiar with GitHub-based project workflows and version control. - Experience working with multiple technologies within a single project. - Strong problem-solving mindset developed through hands-on debugging of software and hardware projects.

AREAS OF INTEREST

AI Automation • SaaS • ERP • Tech Sales • Business Development • Product Growth • AI/ML • IoT • Software Products • Customer Solutions
